Student Responsibility Planning Template

Students who have a sense of ownership in their classroom, make instructional choices, and take an active part in the learning process are more engaged. This engagement leads to higher retention of core content and skills and results in academic success. Complete this chart to identify your current level of student-centered classroom management and determine practical steps toward building even greater levels of student responsibility in the classroom.

	Current Practices What are you doing now to manage these areas?	**Possible Structures** What might you do to manage these areas AND provide students ownership over the process?	**Possible Strategies** What supports could you put into place to foster student success in this area?
Time Management: How are decisions made regarding student use of time in the classroom?			
Project Management: How are decisions made about the order of instructional assignments/projects completion?			
Resources: How are decisions made about what resources students will use to accomplish learning goals? How are classroom materials managed?			
Assessment: How is student work assessed? How are goals set for student progress?
